I'm a UX/UI designer and researcher with 4+ years of experience creating clear, scalable, and reusable design solutions. I focus on enterprise software, where I structure complex logic, design intuitive workflows, and build component-based systems. My work combines practical UX design with hands-on research and usability testing, helping companies make confident, user-focused decisions.

Knapp (Epilog) — Senior UX/UI Designer and Research (full-time)   (Feb 2025 -Now)

- **Created and led a scalable multi-device design system** that delivers a unified experience for enterprise environments.
- **Accelerated design and development processes by 63%,** enhancing efficiency and continuity across the entire company.
- **Conducted UX research across global user groups** and translated cross-cultural insights into clear, decision-ready metrics.
- **Analyzed friction points in the flows for clients Walmart and Würth** and delivered clear fixes to streamline operations.
- **Converted an old desktop product into a new web-based generation** by analyzing existing workflows, simplifying the logic and adapting the product for a fully web environment.
- **Improved user decision clarity by 33%** by restructuring screens and helping users understand and act on data more confidently.
- **Developed a design system for pilot projects**, boosting consistency and delivery speed by 10%.

Cirriosoft — UX/UI Designer (full-time)   (Jul 2021 - Nov 2022)

- **Designed a platform that turns psychological test inputs into objective,** comparable data with clear, scalable metrics.
- **Worked with cross-design and cross-functional teams** to align data, UX patterns, and business goals into one product vision.
- **Created a cohesive visual identity** that strengthened brand consistency across all communication channels.

Freelance UX/UI Designer — (Occasionally)   (Jul 2020 - Now)

- **Manage end-to-end design** processes research, design, prototyping, and implementation for clients in industries like wedding planning and digital invitations.
